DAWN +Humidifier	270 Sq Ft	-	Low 22, Med 12, High 7

Tips to keep your diffuser clean & running smoothly:

Take good care of your diffuser by regularly cleaning it. Without proper cleaning, your diffuser can develop buildup that can shorten its lifespan. Wipe out with a dry cloth between uses and for a deep clean, use the instructions below.

- Turn on your diffuser.
- Fill the water reservoir halfway to the line with clean water.
- Add 10 drops of pure white vinegar to the water reservoir.
- Turn it on and let run for 3-5 minutes, allowing the vinegar to disperse throughout.
- Drain the water reservoir completely.
- Dip a cotton swab in white vinegar and wipe down the edges of the water reservoir as well as the ultrasonic mist chip.
- Rinse the water reservoir with clean water.
- Wipe the reservoir with a dry cloth and let air dry before using it again.
